Sharing by HKDSE Outstanding Student 2022

Life as a secondary school student is never easy, as we face many challenges. School life under Covid-19 was extremely tough for many people, especially senior form students (including me) who were preparing for the HKDSE. However, at Kei Yuen, we are lucky to have helpful teachers and friendly schoolmates who are always willing to help us, stand by us, give us support. Therefore, I would like to express my sincere gratitude to all the teachers and KeiYuenness.

"To give myself a chance to choose". It may sound strange, but the fact is that the higher the grade you achieve on the DSE, the more choices you have in of tertiary education.

Although getting good grades is essential, mental health and social life are equally important. Take a rest when you feel exhausted, depressed or anxious. After all, your health is more precious than your academic results. Whenever you feel tired, stop studying and do things that you enjoy. Chatting with your friends and family can also boost your energy level so that you can go even further. Work hard and play hard.

I hope that all of you can have enjoyable school lives at Kei Yuen College and that your dreams can come true.

6C Ng Chin Wing
Bachelor of Economics and Finance, HKU

Online learning can hinder our studies, as many uncontrollable factors can disturb our learning. However, in my case, days at home were an opportunity to study harder and achieve more. We were able to plan our own learning schedules and adjust them to suit our needs. Study apps, such as Yeolpumta, could help us do this. We could also make good use of this time to equip ourselves with knowledge and learn not to give up when we encounter obstacles. I believe that our efforts paid off.

Never underestimate yourself and strive for excellence. People always ask me, "What is your motivation for studying hard?" I reply,

Love never fails

1 Corinthians 13:8

CCC KEI YUEN COLLEGE

“Love Never Fails” – the theme for our school’s 40th anniversary. Striving to provide 40 years of comprehensive learning experiences for our students, we have remained committed to the school mission of nurturing brilliant generations with whole-person development and passion for learning. Our school will continue to shower our students with love and care and guide them to become contributing members of the global community. You are cordially invited to join our celebration to glorify God and share the pride and joy of this milestone anniversary.

Rev. Peter Wong Memorial Scholarship

Everyone has their own dreams, and I am no exception. I know it is a challenging career path, but I have always wanted to be doctor. Being a doctor, I can help save people's lives. It is definitely a meaningful job.

As for my learning strategies, I find it particularly effective to do self-study to prepare for lessons, jot notes during lessons and revise the content covered after lessons. We may sometimes face challenges, but we should never give up.

Rev. Peter Wong Memorial Scholarship

I am fascinated by the Chinese language. I hope I can become a writer in the future since I appreciate how writers can elegantly express their thoughts and emotions in words.

As for study tips, we should pay attention in class by jotting notes and organising what we have learnt using concept maps. Also, it is crucial to spend time after school revising the key points mentioned by teachers. This can help us to reinforce our memory and better prepare us for the exam.

In addition to memorizing all the concepts and knowledge from the textbooks prior to the exam, I always recall the importance of reviewing past work. This allows me to test whether I can digest the knowledge and apply what I learnt previously.

It always seems impossible until it's done. Therefore, we should always work hard to achieve our goals.

It has always been my dream to be a physiotherapist. It is meaningful, especially when we can help patients

to recover from their injuries. To achieve my goal, I study hard to earn a place in the relevant subject at the university. Different people have different learning strategies. For me, I use a concept map when doing revisions, which is a visual way to represent the information we are study. The concept map also helps us to find the link between different concepts. In addition, it is essential to prioritize our tasks so that we can strike a good balance between study and rest. There is no free lunch in the world. Let's work hard together and make our dreams come true.

KYC Scholarship

Top Awardee for MOOCs Award

I am glad to have this opportunity to share my future goals and some advice on learning.

Growing up, I never had a career that I was particularly passionate about, but during the past few years at KYC, I have discovered my interest in science and the human body. It is my dream to one day conduct research in biology. To do that, I hope to get into the School of Biomedical Sciences at HKU.

To all the new S.1 students, welcome to CCCKYC! Here is some advice that I hope will be helpful for your studies. First, prepare before classes and revise after classes. Simply taking 10 to 15 minutes to preview the learning materials helps you understand what is covered during lessons. Reviewing what you have learned on a daily basis makes studying for exams a lot easier!

Another piece of advice is to create a to-do list. Sometimes the number of tasks to be completed is just overwhelming. By writing them down, you can organise your time efficiently, which in turn reduces the amount of stress.

Lastly, I wish you all a fun and fruitful school life at CCCKYC. Do try your best and remember that the teachers are always there to help you!

2021/2022 年度模範生

傑出中文小作家

Being a teacher has been my dream since childhood, and I would like to study Chinese Education courses to make that dream come true. Inspiring others and contributing to society are always meaningful pursuits.

Persistence is the key to success. Under no circumstances should we give up halfway. I will keep going since I have a clear destination and strong faith. We should try to set a goal for ourselves and spare no pain to achieve it. Besides studying hard, a suitable learning method is also indispensable. Rote learning is inefficient and meaningless. So, whenever we come across any difficulties in learning, we should approach our teachers to clarify our doubts. All the teachers at KYC are always willing to help us.

Tomorrow never comes, because when it does, it's today! Do not find any excuse, do it with confidence and strive for your goal right now. One day, all your effort will pay off.

5C Chan Sum Lui

Congratulations to S.5 Lai Ting Ting, the Winner of the Student of the Year - Visual Artist 2021

I am delighted and proud to receive this award. I would like to express my gratitude to the SCMP and Hong Kong Jockey Club. Also, I am honourable to share my feelings and experience with you all.

Thank you to the school that gave me the golden opportunity to join this competition. The theme of the competition was "Together we grow and achieve". I encountered the top students from different secondary schools in Hong Kong. I am very grateful to achieve this milestone form which I met a lot of people who I befriended along the way. My positive growth experience through entering this competition has also confirmed my choice of career in Visual Arts. It's more than just a hobby for me. I need to be seen.

Last but not least, I am so honored to be the recipient of this award and thrilled to be able to show my artwork to the public. In the future, I hope that the artistic skills that I have acquired over my secondary school and the competition experiences will inform, develop, and shape me as I continue to become an interior designer.

SA Lai Ting Ting, Joanne

Champions of Junior and Senior Division Odyssey of the Mind Pin Design Competition 2022

I am honored to be the Champion of the Senior Division Odyssey of the Mind Pin Design Competition 2022. In this pin design, I have used the composition of Chinese White Dolphins, Aqua Luna, and the scenery from the Victoria Harbour to express the special features of Hong Kong. By using ocean-related elements, I hope to capture the attention of the audience and portray the message of peace, harmony, and vibrancy in Hong Kong.

Being presented with this award shows that hard work and persistent effort do eventually get recognized. I will continue to self-improve and hopefully create even better artwork for people to enjoy.

At last, I would like to show my deepest gratitude to my Visual Arts teacher Ms. Chu for her continuous guidance, encouragement, and support. She is an inspiration to me and many others in our class - without her practical ideas and suggestions, I would not have been able to receive this award.

Ng Yu Hei
CCC Kei Yuen College

I am so glad and honored to be the Champion of the Junior Division of the Odyssey of the Mind Pin Design Competition 2022 and would like to thanks to everyone who gave me support.

The app I used was called MediBang Paint. In my design, I used a dragon boat to carry the iconic buildings of Hong Kong. In the centre of my work is a minibus that carries Omer the mascot of Odyssey of the Mind and also a panda which is a significant refers to the animal in of China. Besides the dragon boat element was a moral of Hong Kong being on an upper grade. I really appreciate my Visual Arts teacher Ms. Chu, who is a truly inspiring teacher. Her brilliant advice and ideas always inspires me. Also, our school has infinite resource and support so that I can create my art pieces. At last, being able to achieve this award is a huge pride for myself.

2A Ng Yu Hei

New Teachers

Introducing Ms Chiu Yuen Han, Teacher of Geography

My name is Ms. Chiu Yuen Han. I am a Geography teacher. Besides teaching Geography, I also teach Citizenship and Social Development in this academic year. I am a Christian, so I am glad to have a chance to serve in the student fellowship. I hope I can meet you at fellowship activities and share the love of God together.

In my leisure time, I enjoy reading and hiking. I like to read books about personal growth and psychology. Being close to nature makes me feel relaxed and happy.

I look forward to meeting you all.

Ms Chiu Yuen Han

Introducing Ms Hui Yu Yuk, Teacher of Mathematics & Computer

Greetings everyone! I am Ms. Hui. I am delighted to be a member of KY family. All of you are so nice and make me feel warm. In my spare time, I enjoy reading, swimming and jogging. I am the form teacher of Class 1B this year. You usually see me around in Mathematics lessons or Computer lessons. I believe that all of you are talented in different aspects. Therefore, be aware of yourself and know yourself more. Nowadays, being a teacher is full of challenges. However, I am still committed to my job as I treasure the connection with the youth and most importantly, I can witness your growth and be part of it.

Look forward to getting to know all of you more.

Ms Hui Yu Yuk, Kimberley

Introducing Ms Ip Wing Shan, Teacher of Mathematics and Science

Hello everyone, I am Ms Ip Wing Shan, Maggie. I am glad to join Keiyuen family and I teach Mathematics and

Science in this academic year. I am a Christian. Like all of you, I knew God in my secondary school. I hope I can share the love of God and the greatest blessing with you. You are invited to join our evangelistic activities!

I have many hobbies, such as travelling and reading. My favourite novel is Harry Potter. It is imaginative, funny, and full of love! I'm an outdoor person too. I like hiking and camping in the winter while I go canoeing in the summer. Moreover, I like Japanese culture and I am learning Japanese by myself. I am looking forward to knowing you all soon!

Ms Ip Wing Shan

Introducing Mr. Sham Cassino, Teacher of Mathematics

Hello everyone, this is Mr. Sham Cassino. I am glad to join Kei Yuen College this year. I am teaching S2, S4 and S5 Mathematics and I am also a Form Four class teacher this academic year. I obtained my Bachelor degree majoring in Statistics, and Postgraduate Diploma of Education majoring in Mathematics Teaching at the University of Hong Kong. Besides, I studied my Master degree majoring in Mathematics at the Chinese University of Hong Kong. I have been teaching Mathematics for

many years and my students were of different academic abilities. Although not all the students are good at Mathematics, I do believe that everyone is able to try their best to learn Mathematics and make use of it in daily life. Students may encounter a lot of failures and successes during their learning journeys. I wish my students have a willingness to fail and an obsession to succeed. It is all right to fail as long as we learn

the lesson. Never give up and be positive! Let's celebrate all the good things in our lives.

Mr. Sham Cassino

Introducing Mr. Tsang Wai Nam, Teacher of Life Education

Hello! I am Mr. Tsang Wai Nam. I am the new Life Education teacher at KYC. I believe that most of the students know me before, as I was the student counselor at KYC from 2018 to 2022. It is my great honour to learn with our lovely students and have memorable moments in the future.

This year, I will teach S.1-S.3 Life Education lesson, and continue to promote the idea of "Growth Mindset". I believe that this concept can enhance our perseverance, and I am looking forward to seeing your participation during the lessons.

Besides, I am one of the guidance teachers. Lots of activities will be held by the Guidance Committee. I highly recommend all of you to come and join us! Also, please feel free to share with me.

In my personal life, I like eating something spicy, like Thai food and Sichuan cuisine. Also, I like traveling to Thailand and Japan. However, due to the pandemic, we cannot leave Hong Kong. I hope that in the coming year, we can travel and have study trips.

Mr. Tsang Wai Nam

Sharing by Aerosim Inter-School Aviation Tournament

It's an incredible honour to be the Champion in Aerosim Inter-School Aviation Tournament. This award made me more determined to be engage in the aviation career. Moreover, the opportunity of aviation training abroad in the future gives me a greater chance of becoming a pilot.

I would like to thank Mr. Cheng and Mr. Lee for giving me this chance to join the competition. The school has provided infinite equipment and resources for us to learn more in the competition. I would also thank my teammates for their knowledge and opinions shared. Without their support, there is no way for me to attain this achievement.

There were four major parts in the competition: basic aviation knowledge test, group project on previous accidents, flight planning and flight simulations. At the beginning, I learnt the basic aviation theory from the official course purchased by school called Part 61. The course taught me many professional skills and instructions that is are used for pilot license exams. After finishing the test, my teammates and I needed write a report on a flight accident as a group project. We needed to search information on the official report published by Civil Aviation Department. Our team read over 200 pages to gather information about this accident, including how this accident happened and the timeline of different events. At last, we filmed a video report as our group project. After I was announced as the finalist, my newly formed team and I needed come up with a flight plan. With only starting points and destination given, we had to fly the aircraft by ourselves without using the digital guiding

instruments. We needed to count on the time and speed of the plane to find the correct timing for turning, ascending, descending and levelling off. Our team successfully arrived at the required destination precisely, showing that our calculations on the effects of wind were almost perfect. The last part in the final is flight simulation in which, I was required to perform takeoff procedures and different turnings. The hardest part is stall recovery. I need to slow down the aircraft to almost zero lifting force to simulate the accident. After the stall warning went off, I needed to bring my speed back up and return to the normal flight to prevent from a crash.

This competition truly tests the ability of handling the emergency situations, calculations in aviation, problem solving and cooperation between teammates.

6D Fan Ka Hei

Reflection writing of 'farm to school'

I am so glad that I joined a meaningful program in which I could farm at school together with my group mates. This program started in November. During geography lessons, we learnt about climate change and famine problems worldwide. To better understand these topics, our group joined this program. Through the program, we understood the planting process clearly and learned how to successfully grow different types of vegetables. For instance, we were taught how the growth of some vegetables can be easily affected by some environmental factors, such as the fertility of the land and the use of fertilizers. In this program, I felt the joy of planting like never before. Most importantly, the program helped expand my knowledge outside textbooks.

Firstly, our school invited a farmer to teach us some planting tips. He also introduced different kinds of vegetables that can grow well in Hong Kong and gave us some information about the major food supply of Hong Kong. After knowing the basic knowledge of planting, we started to uproot weeds, clear gravel, and decide which vegetable to grow. At last, we decided to grow lettuce and tomatoes.

Secondly, we started to loosen the soil using a hoe under the instructions of the local farmer and successfully created an excellent growing environment for the seeds. Although it was just a small field, we still spent much time there. Throughout the process, we all felt very relaxed as we could be in touch with nature. It was also an invaluable opportunity to learn and have fun simultaneously.

Every few days, we went watering and weeding and observed how the seeds germinated and

grew slowly until we could reap what we sowed. It was an unforgettable experience for us. In this program, I also found the importance of teamwork. We had to work as a team and coordinate well to grow the vegetables well.

Overall, this activity benefited me greatly as I could acquire new knowledge and skills. We are thankful to our teachers for giving us this rare opportunity. I hope we can join similar learning activities!

4D Yiu Kam Yan

Due to COVID-19, our school life has been affected for several years. Yet, we can still learn beyond the classroom. Many students taking geography as one of their elective subjects are members of the Gardening Club. Before the first club meeting, we had to choose some seeds that can grow well in winter. Through this, we learnt more about farming.

It's great that a local Hong Kong farmer, Mr. Wong, was invited to teach us some farming skills. Farming was not as easy as we expected. In fact, it took us a lot of time and effort to learn the fundamental skills. We learnt how to use special equipment like a rake and understood the importance of organic soil created by the decomposition of plant and animal materials. We also had to tackle various problems throughout the whole process. As the growth of plants can be easily affected by the weather, we had to make sure the plants were watered daily, especially in winter.

In my opinion, this activity is undoubtedly meaningful and educational as it reminds me of the Keiuenese virtues— respect, perseverance, and gratitude. All farmers deserve our respect and gratitude as they work hard to supply the world with food. No matter how challenging the situations are, they never give up. This is something that we can learn from them.

4C Ng Tsz Yiu, YoYo

Sharing by Student Union Chairperson

Hello, I am Wong Chun Lung from 5D. As the chairperson of the Student Union, I am very honored and delighted to work with my team of 13 members. Your support and advice make us go further and further.

As the chairperson of the Student Union, not only do I take up the responsibility of being a leader, but I also unite schoolmates of various backgrounds and cultivate their sense of Keiyuenese.

"Do not follow where the path may lead. Go instead where there is no path and leave a trail." Ralph Waldo Emerson

This quote has inspired me to become a unique leader, daring to innovate. We aim to gather our creativity, knowledge, ability, and soul to create exceptional events for everyone. In addition, as a bridge between the school and schoolmates, we would value the opinions and interests of each stakeholder in order to make constructive suggestions.

It is never an easy task to form a student union, we have definite experienced ups and downs during or after the election. Managing a meeting, coordinating an event, and finalising discount offers are some of the challenges that we have not met before. However, we always remember our goal to serve students with all-out efforts. No matter how tortuous the road is, we strive for the best and pull out all the stops.

We, on behalf of the members of the Student Union, will continue to lead with our hearts and leave our own trail, to serve KeiYuenese wholeheartedly, and spread-out the spirit love and care to everyone. Thank you all for having faith in us. We promise to fulfil our duty and be a role model of all of you!

5D Wong Chun Lung

「每天好精神」標語創作比賽

疫情之下，各人的生活壓力倍增，加上五月時學生回復面授課堂，雙管齊下，同學承受的精神壓力自然增加，而負面情緒在此刻更不自覺醞釀，不同的表徵亦因而湧現。適逢知道有此標語創作比賽，標語有着鼓舞人心的作用，以最簡單的字句，表達深刻的意思，成就具感染力的文字。我因此希望創作一句有關精神健康素養的標語，以簡單的字句提醒各位，避免陷入負面情緒的循環中。僥倖地，我獲得高中組的冠軍，並以學生代表身份在台上進行分享，深感榮幸。在創作過程及與嘉賓對談中，加深了對是次比賽主題—精神健康質素的認識，真的上了寶貴的一課。

6C 王雅琪

On behalf of prefect, we participated 元朗警區「少智強・紀律與守法」防騙一分鐘短片創作比賽 and we are glad to be the first runner-up.

It is a video-creating competition which aims to enhance public safety consciousness interestingly. The members of the Prefect Team decided to perform a drama in the video. At first, we were all afraid of not being able to handle it as we had never joined this kind of competition, but we all tried our best and we did it! From writing the script to editing the video, we worked together it was a joyful, exhilarating and meaningful experience. We are glad that we are the first runner-up of the competition.

When it comes to the adversity we face, there is no shortage. Probably the first one that comes to my mind is that it is challenging to choose the theme of our drama. Luckily, we have a lot of creative and novel ideas, and combining all of them, we wrote a story about a wicked girl acting like a boy to cheat an adolescent. Besides the theme, acting is also a massive challenge for us. We had no experience in acting, and the roles were so different from us in reality. In an attempt to produce magnificent work, we all stepped out of our comfort zone and did a great job.

It is our honour to have the tremendous support of teachers, schoolmates, and relatives. Without their encouragement, we could not have completed the task successfully.

Participating in this competition is a valuable experience for us. We hope that we have achieved the goal of raising public safety awareness innovatively.
