Sharing by a 2023 HKDSE Outstanding Student

Learning is an ongoing process, an essential skill that holds significance at every stage of life.

I am sincerely grateful for the six years of learning I have experienced in KYC, which have brought both joy and tears. Fortunately, I was able to achieve my goals in the end. Although I wasn't among the top students in junior high school, I consider myself fortunate to have had exceptional teachers who recognized my potential and nurtured it, allowing me to regain confidence and establish clear goals. Consequently, I no longer drifted aimlessly through life.

During my time in Form 3, I made a firm decision to pursue a career in medicine. I firmly believed that it was a noble profession that offered immense opportunities to help others. Additionally, given the current shortage of medical professionals, I felt a strong sense of social responsibility. However, I must admit that meeting the admission requirements for medical school presented significant challenges, and there were

moments when I contemplated giving up. Thankfully, with the unwavering support and assistance of my classmates, teachers, and family, I managed to persevere.

My learning journey was far from easy. In addition to encountering

academic obstacles, it was crucial for me to adjust my mindset. In the past, anxiety plagued me, leading to insomnia during exams or regular studying. Nevertheless, I later realized that my anxiety stemmed from the disparity between my expectations and reality. The only way to address this was to diligently work on self-improvement and strive to align myself with my ideal state. Consequently, whenever I felt anxious, I dedicated myself to revision and personal growth. As a result, I experienced a sense of inner fulfillment, and my improved mindset positively impacted my academic performance.

Furthermore, it is important to recognize that each individual has their own unique approach to studying. There is no need to force oneself to adhere to someone else's schedule. Discovering a rhythm that suits one's personal style is the most efficient way to learn. It is vital to not only work hard but also work smart. Maintaining both physical and mental well-being is crucial in order to achieve our goals.

Lastly, I wish to emphasize that giving your all does not mean devoting all of your time to studying. As long as one feels that they have exerted the effort necessary to align with their goals, that is considered giving it their all. It is permissible to take breaks, engage in enjoyable activities, and cultivate personal interests. Only through holistic development can we make the most of our high school years.

While studying is not the sole path to success, it presents an opportunity that is relatively easier to seize. The HKDSE examination is not a final destination but rather a milestone in life. Instead of dwelling on the amount of effort invested, let us continue moving forward until we reach the finish line. Never cease learning, for life never ceases to teach us valuable lessons.

6D Chan Ka Lee

2022-2023 中一級至中五級成績優異學生

2022-2023 S.1 - S.5 Outstanding Students

中一級 S.1

- ☆ 1st place in Subject (Geography, Putonghua)

2C Huang Jinhao

Throughout my first year at Kei Yuen College, I have learned many valuable lessons from our principal, teachers, and fellow schoolmates. One important lesson I have grasped is the significance of striving for excellence. However, I have also come to understand that our social lives should not be neglected in the pursuit of academic success. It is crucial to have fun and engage in activities that bring us joy. For example, participating in extracurricular activities provided by our school can be a great way to meet new people with shared interests. Additionally, dedicating time to our hobbies not only allows us to develop our skills but also strengthens our minds.

As for my learning strategies, I have found that making the most of self-regulated learning (SRL) is essential. It is important not to take this time for granted. I make it a point to review the topics covered in class by jotting down notes and summarizing key points. Taking the pre-lesson worksheets seriously has also proven beneficial, as they provide a preview of the upcoming lesson and help me better understand the topic. Actively participating in class, paying close attention, and taking note of any useful tips and tricks shared by the teacher are crucial for effective learning.

When it comes to exam preparation, doing past papers has been a valuable practice. It allows me to identify my weak points and pinpoint any careless mistakes, enabling me to be more cautious and avoid them during actual exams.

Remember, failure is not an obstacle but a stepping stone towards success. Many successful individuals have faced failures along their journey. Embrace your failures, learn from them, and let them fuel your determination to achieve greatness.

“

Hey everyone! I'm Huang Jin Hao, and I'm excited to share my future goals with all of you. If I have the opportunity to attend university, my dream is to pursue a career in medicine. The field of medicine has always captivated me, and my passion lies in making a positive impact on people's lives as a doctor. However, I am well aware that becoming a doctor is no easy task. It demands unwavering dedication, hard work, and perseverance.

Each person has their own unique learning approach, and I've discovered that my most effective method involves a combination of self-study and thorough review of the materials taught by our teachers. I firmly believe that learning is a lifelong journey, and we must remain committed to our studies in the long run.

”

- ☆ KYC Scholarship
- ☆ S3 MOOC Scholar
- ☆ 1st place in Subject (Chinese Language, Geography, History)
- ☆ Good Conduct & Academic Excellence Award
- ☆ C.F. Ho English Award (2nd Place in English)
- ☆ 1st place in Form
- ☆ Good Conduct

3D Tsui Hong Ching

I'd like to share some strategies that have worked well for me. My hope is that other students can benefit from these tips as well. To make the most of the self-regulated learning period, I always prepare for upcoming lessons by reviewing the textbooks and taking my own notes. This helps me to gain a deeper understanding of the material, and I find that I remember it more easily. Additionally, it's crucial to review what you've learned each day to reinforce your knowledge. I've found that creating mind maps or tables is a helpful way to practice active recall and solidify my understanding.

When it comes to studying, one key lesson I've learned is the importance of breaking down large amounts of materials into smaller tasks to foster long-term success. Instead of attempting to cram everything in at once, I create a to-do list and address a few items each day. It's important to maintain a passion for learning, so I strive to stay motivated and focused by taking breaks and engaging in activities I enjoy.

To sum up, I want to emphasize that achieving academic or personal goals requires hard work and dedication. It's easy to feel overwhelmed or discouraged, but it's important to remember that success is within reach with the right mindset and approach. As Nelson Mandela once said, "It always seems impossible until it's done." Let's work hard and strive to accomplish our goals.

- ☆ 1st place in Form

4D Kwok Sin Yu

I am grateful for the opportunity to share my learning experience and the strategies that have helped me achieve academic success. Difficulties are inevitable in the learning process, but they are also valuable. By finding solutions to these challenges, we can become more intelligent and capable.

Throughout my learning journey, I have encountered various obstacles. Whenever I feel confused about a particular concept and struggle to grasp the underlying principles, I seek advice from my subject teachers, who are always willing to assist me by using visual aids such as graphs and examples to clarify the material.

In addition to seeking guidance from teachers, there are several effective learning strategies that can be beneficial. Personally, I have found that taking notes is a valuable method as it allows me to organize my thoughts clearly and concisely, facilitating more effective revision. Furthermore, reviewing the content I have learned after school helps me consolidate my knowledge and reinforce my understanding.

Above all, it is crucial to believe in oneself and never give up. With effort and perseverance, anything is possible.

中五級 S5

- ☆ C.F. Ho English Award (1st Place in English)
- ☆ KYC Scholarship
- ☆ 1st place in Form
- ☆ 1st place in Class
- ☆ 1st place in Subject (English Language, Mathematics, Physics, Chemistry, Biology)
- ☆ Good Conduct & Academic Excellence Award
- ☆ Good Conduct
- ☆ Federation of Yuen Long Youth - Yuen Long District Outstanding Students Selection 2023

Over the past five years in KYC, my learning journey has been filled with excitement and discoveries. However, there have been times when I've felt overwhelmed by the number of tasks or lacking motivation to keep studying. In those moments, talking things through with others - whether classmates or teachers - has been incredibly helpful. Learning is a team effort, and by coming together, we can get different perspectives and let the ideas flow, which often leads to a fresh outlook on whatever subject I'm tackling.

Another simple trick to lift my spirits is to remember what a privilege it is to be able to learn in the first place. It may sound odd, but when I'm feeling uninspired, taking a step back to appreciate how lucky I am to get an education helps make the obstacles and struggles feel less intimidating.

As the saying goes, "There is no learning without errors and defeat." Just remember we're all in this together, and you're never alone in this ongoing process of trial and error.

Finalist of the Student of the Year - Visual Artist 2022

First and foremost, I want to express my joy and honor at being given the wonderful opportunity to participate in the Student of the Year – Visual Artist competition, organized by the South China Morning Post and Jockey Club. Although this experience is new to me, I consider myself incredibly fortunate to have received such great support throughout my artistic journey, especially from Ms. Chu. Without her, I wouldn't be able to participate in this stage.

For me, art serves as a means of capturing not only the beauty of life but also the emotions of its creators. Bright colors can signify happiness, while dimmer hues may represent sadness. The messages conveyed through artwork are always influenced by the emotions felt during its creation. While some people may not notice these subtleties, I personally feel a range of emotions – joy, love, and occasionally sadness – when I am in a gallery. This is why I am so passionate about the arts.

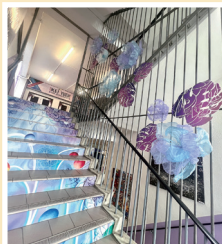

Speaking of conveying messages through artworks, an important lesson I have learned while creating my own work is that I used to pay too little attention to social issues. As a result, I have embarked on a series of artworks that explore the negative impacts of the rapidly growing trend of fast fashion. This not only keeps me informed about international events but also serves as a medium for drawing public attention to the detrimental effects of fast fashion.

Last but certainly not least, I hope that the artistic skills I acquired in secondary school will not only contribute to my future career but also that the experience gained from participating in this competition will propel me towards achieving my dreams.

6C Lam Kwan To

過往曾獲獎比賽項目包括：

- 全港青年繪畫比賽2021-22（優異獎）

Italy Venice International Youth Art Competition 2023

I am more than honoured to receive the golden award of Italy Venice International Youth Art Competition 2023. Firstly, I would like to thank the International Gifted Education And Art Association for recognising my artwork and appreciate my behind the drawing.

This artwork revolves around our future, the uncertain events that will unfold on Earth. This theme provided me with an opportunity to express my imagination and creativity. In my mind, I envision a peaceful life for humanity, where everyone coexists harmoniously with animals, free from pollution and conflicts. I am truly grateful to the organizers of this competition for offering me a platform to convey my perspective on our future through my drawings.

I also want to express my admiration for my Visual Art teacher, Miss Chu, who has provided me with opportunities to participate in various art competitions and has inspired me with fantastic ideas for my artwork. Her guidance has allowed me to think outside the box and create meaningful pictures. Lastly, I am thankful to my extended family and friends for their unwavering support in my journey in Visual Arts.

5D Luk Sum Yin

The Leap Taekwondo Competition

It is a pleasure for me to share my journey of becoming the champion of the Leap Taekwondo competition. In order to achieve this milestone, there is no doubt that I had to put in a lot of effort to practice my skills. However, I believe that my success not only represents my personal triumph but also embodies the spirit of perseverance and never giving up.

Throughout this competition, my main concern was maintaining a weight below 63kg, which was the greatest challenge for me. What if i'm craving chips and coke? Unfortunately, I could only gaze longingly when my friends are eating them. I had developed a "healthy palate" for myself. There were moments when i almost cannot resist the temptation of the delicious food, but I held onto my goal with my determination. I reminded myself of the sacrifices I had made and the countless hours of training I had dedicated to preparing for this competition.

When I reached the final match, I was faced with an opponent who was a member of the Hong Kong TKD team, towering at an impressive height of around 190cm. As the shortest participant in the competition, I couldn't help but feeling unconfident. However, the arduous memories suddenly flooded my mind, and i reminded myself that all of my effort will pay off in this moment. 'Just do it!' my mind repeated, and this phrase became the only thought in my head.

Furthermore, the process leading up to the final match was a rollercoaster of emotions. There were moments of anxiety, self-doubt, and fear. But I refused to let these emotions consume me. Instead, I focused on the immense support I had received from my coach and friends.

Their belief in my abilities, their words of encouragement, and their unwavering faith in my potential gave me the strength to overcome any obstacles that came my way.

I want to express my deepest gratitude to my coach, whose 1 to 1 guidance and mentorship have been instrumental in my success. He has pushed me beyond my limits, introduced me to the values of discipline and perseverance, and never allowed me to settle for mediocrity. His unwavering belief in my abilities has fueled my determination to become the best version of myself.

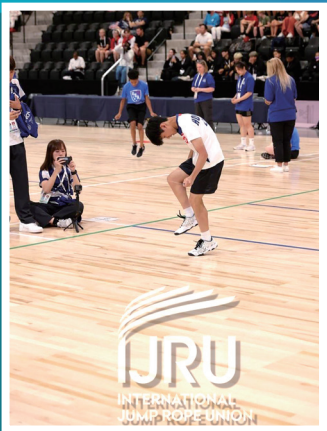

Moreover, I would also like to express my gratitude to my friends and teammates. When I was struggling from exhaustion, they provided me with the motivation and support I needed. Just because of their encouragement, I managed to summon the last bit of energy and achieve an honorable result.

In conclusion, this victory is not mine alone. It is the result of a collective effort, a culmination of the support and belief bestowed upon me by my coach, friends, and teammates. Looking back, this experience has taught me the value of perseverance, the importance of never giving up, and the strength that comes from having a strong support system. I am deeply grateful for the opportunities and challenges that come with being a competitive athlete.

5D Lam King Wang

IJRU World Championship 2023

It is a great honor for me to be the champion of the Aged 12-15 Male Single Rope Individual Freestyle, as well as Individual Overall, in the IJRU World Championship 2023.

I consider myself fortunate to have had the opportunity to participate in this championship, which has taught me many valuable lessons such as respect, a positive attitude, and integrity. The importance of good sportsmanship and team building are among the most pivotal lessons I have learned from this invaluable experience.

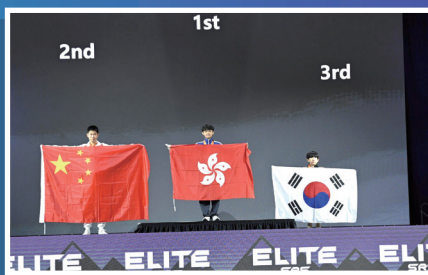

The journey towards success was never easy. It required a lot of practice and a great deal of effort. I encountered various challenges along the way, but I am grateful that I was never alone. I had the unwavering support of my teammates and coaches who stood by me during those difficult times.

Furthermore, I am incredibly grateful for the constant support and belief I received from the principal, teachers, and schoolmates. Their support has solidified my beliefs and inspired me to work even harder towards my goals.

Above all, I recognize that all of these achievements would not have been possible without the countless unconditional support and trust of my family.

This experience has been a precious learning opportunity for me. It took me seven years to reach this level of success, and I sincerely thank all the people who have continuously supported me. I promise to continue giving my very best and utilizing my potential, and I am confident that there will be more awards to follow.

4D Tang Ho Yiu

Fulfilling Experience of Art Jam Day 2023

The Art Jam Day always provides a truly precious experience, offering us an opportunity to showcase our creativity in art. It creates a collaborative learning environment where we can share ideas and support each other throughout the entire process of crafting.

Form Two students have the freedom to choose from various craft options. Surprisingly, they can even opt to create their own lamps or lovely bags. As one of the helpers, we had the chance to teach them how to make flower-shaped ornaments this year. It was a truly memorable and special experience, as we recognized the challenges they faced as beginners, trying to follow those difficult and intricate steps. However, they gave their best effort and remained focused on solving any problems that arose. Witnessing their enthusiasm and joy as they created their own charming floral designs reminded me of the transformative power of art. It was a privilege for us to guide them through the process, ignite their creativity, and nurture their talents.

This entire teaching experience not only allowed us to provide assistance to our schoolmates in completing their crafts but also helped us understand the power of art in bringing people together. The sense of fulfillment we felt when we saw them proudly holding their finished crafts, accompanied by smiles, was truly rewarding. Moreover, engaging in craft-making during Art Jam Day provided us with a much-needed respite from the pressures of exams. Therefore, we are immensely grateful to be part of the Art Jam Day, given its joyful atmosphere infused with students' passion for creativity. We eagerly look forward to future iterations of this meaningful event.

4C Tang Sze Yee

Introducing Ms Heather McCann, Native-speaking English Teacher (NET)

My name is Ms McCann. I am one of the NETs here at CCKYC College. Let me introduce myself. I was born and brought up in New Zealand, and I also spent part of my childhood in the US. I have lived in New Zealand, Australia, the US, and the UK. I have also travelled widely. As well as being a native speaker of English I also speak French as my second language. I have studied Spanish, German and Russian as well. Learning languages is one of my interests but Cantonese is proving to be a bit of a challenge! My other interests are making music, writing poetry and short stories, and playing Speed Scrabble. Happy to be here to serve the CCC Kei Yuen College Community.

Ms. Heather McCann (Middle)

Introducing Mr. Abraham Kheteng, Native-speaking English Teacher (NET)

Hello, Keiyuenese! My name is Mr. Abraham, and I am thrilled to be teaching Reading Across Curriculum. It is an honor to be a part of this wonderful school community.

For the past three years, I have had the privilege of living in the vibrant city of Hong Kong. When I am not in the classroom, you can often find me out in nature, camping and hiking with my friends. I also have a passion for playing Hockey, and you might spot me on the field in the evenings.

One of my greatest joys is traveling, and over the past two years, I have had the incredible opportunity to explore South Asia. Each new destination has broadened my horizons and deepened my appreciation for diverse cultures and ways of life.

As an educator, I strongly believe that creating a supportive, open, and communicative environment in the classroom is essential. When students feel safe, secure, and valued, they are more likely to thrive and embrace new challenges. It is my goal to ensure that each of you feels special and appropriately challenged throughout our time together.

Mr. Abraham Kheteng (Right)

Mainland Study Citizenship and 公民與社會發

New Native-speaking English Teacher (NET) at CCCKYC — Mr. Raymond Carl Hizon

Hello there! I am Mr. Hizon, a new English Teacher at CCC Kei Yuen College. For the past 10 years, I have been teaching English in Hong Kong to students of varying ages. This year, I am an S.1 English Language and Speaking Teacher, as well as a Speaking Teacher to S.3 and S.5 students. On top of that, I will be overseeing the Debate Team. I take great pride and pleasure in training students to become champions in English speech competitions. So if you want to expand

your speaking, critical thinking, and research skills, I gladly welcome you to join the competitions and Debate Team.

As for my hobbies, I enjoy reading, running, and hiking. I am fond of Hong Kong snacks, among which the Hong Kong-style egg puff (雞蛋仔) is my favorite! I love munching on them after my weekend run from Yuen Long to Siu Hong.

As a teacher, I love helping hardworking students level up their English skills. I am looking forward to seeing you in class and working together with you. So aim high and reach beyond and together, we shall reach greater heights! Moreover, please feel free to chat with me when you see me around school. May we have a blessed school year ahead.

Global Week-Reflections

During Global Week, I had the opportunity to learn and discover many fascinating aspects. Firstly, I gained insights into Jordan, a country known for its unique cultural heritage rather than the MTR Station. Amman serves as its capital, and I discovered that Jordan is considered a less affluent nation. Additionally, I learned about their culinary preferences, particularly their fondness for mansaf, a savory and tangy national dish. It was interesting to observe their distinctive dining practice of squeezing lemon juice onto their rice.

Moreover, I explored several traditional customs from different countries. For instance, in Singapore, it is mandatory for all young men to serve in the army for two years, an experience that tends to bring about significant transformations in their lives. In Germany, I discovered that parents of teenage sons actively assist them in their pursuit of romantic relationships.

Overall, I found Global Week to be an extraordinary event. Engaging in conversations with individuals from diverse countries enabled me to expand my horizons in various aspects, and I thoroughly enjoyed the experience.

5D Adrian Chan

I recently had the privilege of participating in our school's Global Week, and I must say that it was an absolutely astonishing experience. As a student navigating the challenges posed by COVID-19, we have had limited opportunities to explore cultures from around the world. However, thanks to the efforts of our school's principal and teachers, who invited individuals from different countries to share their insights with us, we were able to learn and grow throughout the course of the seven days. During Global Week, we discovered fascinating facts about various countries. For instance, we learned that Ukraine boasts the deepest railway system, and we gained insights into the unique coming-of-age trials that individuals in Gambia undergo to prove their maturity. These discoveries have undeniably broadened my horizons, and I eagerly anticipate the next Global Week.

5D Lo Pak Ki

Creative Fun Day @ CCKYC – Design & Technology Leather-Work Workshop

The Creative Fun Day is one of the school's activities that promotes our school and provides a fantastic opportunity for primary school students to learn basic Design & Technology (D&T) skills. It was a meaningful experience for the students and me.

At the beginning of the workshop, our D&T teacher, Mr. Mok, told the students how to make a leather-textured apple. He introduced the leather tools to us and explained the steps of making the leather-textured apple with patience and kindness. As a volunteer in the leatherwork workshop, our mission was to entertain and guide about twenty primary school students from different schools. To maintain its round shape, the students used strings to thread the surrounding of the apple shape. They also put cotton inside the leather to make the apple look big and round.

During the workshop, I saw the elementary school students putting in their best effort to try to solve the different problems they encountered. It was a great chance for the students to exercise their willpower as they could make their own leather-textured apple by themselves. Through this Creative Fun Day, I had the opportunity to meet new friends and improve my social skills.

Overall, I think Creative Fun Day was meaningful, and this workshop was a memorable experience for me. It was rewarding to see the students enjoying the workshop and learning a lot. I am grateful to have been a part of this activity and I hope the primary school students can use their talents and achieve great success in the future.

4B Cheung Hau Ching

Creative Fun Day @ CCKYC – AI-Inno Lab

As a helper at AI Inno Lab, it was truly wonderful to witness the cheerful and inviting atmosphere throughout the entire event. The twelve primary school students wore big smiles as they were engaged in various activities. I was particularly encouraged by their enthusiastic response during the unmanned drone session. They not only eagerly answered the tutor's questions but also showed great enthusiasm during the drone competition.

Their excitement was palpable when they discovered there was a drone competition, leading to a burst of cheers. Their focused and determined expressions while playing showed their active participation. Furthermore, they displayed impressive patience while listening to instructions and safety advice, and were open to accepting suggestions for improvement.

I felt a sense of fulfillment when we were able to bring happiness and technical knowledge to the students. It's impressive to see how well primary students nowadays perform in such events. As a cameraman, I found it meaningful to capture these happy moments.

Lastly, I am honored to have been a helper at the Creative Fun Day this year. I would like to express my gratitude to my teacher, Mr. Lee, and my partners for their support in making this activity a success.

4A Chan Hoi Chun

Creative Fun Day @ CCCKYC – Basketball Workshop

This year's Creative Fun Day was successfully held on November 4th, and I am honored to have represented the school basketball team in organizing a basketball workshop for primary school students on that day. It's the third time for me to participate in this event, and it was wonderful to see all of them engaged in their interests and enjoying playing.

To start with, we led them in doing some simple skills, such as dribbling and passing. The team that I led was talented, and they were concentrated on each move. Despite some of them not being superb, they all tried their best to finish the task. After they completed the mission, they had a sense of success and wanted to do more. They asked me if there were more special moves to learn. It was exciting to see their love of learning and interest in basketball. While they were practicing, I was grateful to see many of them showing high potential and a willingness to communicate with one another to build friendships. Even though they came from different schools, basketball was a way to bring them closer and meet each other.

Basketball is a brilliant sport that not only trains your own techniques but also teaches you how to interact with others. During the competition, there are many moments that may cause someone to feel unsatisfied. You need to respect your teammates and bear the responsibility together, as we are a team. Last but not least, I hope this memorable event can make them enjoy basketball even more, and I am looking forward to next year's Creative Fun Day to teach those energetic students.

Creative Fun Day @ CCCKYC – Chococlate Cupcake Workshop

Hello everyone, time flies, and it is already my third year as a volunteer Home Economics helper for the Creative Fun Day before I even know it, which is only held once a year. Since the Creative Fun Day has been a popular event at our school, I am not surprised to see the covered playground crowded with primary students lining up to join and experience different academic and physical activities. Let me share this precious and enjoyable opportunity with you in the following!

Initially, Primary 5 and 6 students were invited to the Home Economics (HE) room to have a seat, where they were briefly introduced to the subject. Then, we moved into the cooking room to see a muffin-making demonstration by our Home Economics teacher. All the students were very impressed as it was their first time cooking at school. The groups were then assigned to different tables, each with all the prepared ingredients and kitchen utensils. The students who did not know how to use an egg beater before learned it in the blink of an eye under appropriate guidance and created a mixture of softened butter and sugar. I was proud to see that they were actually able to control the beater as it is quite hard to control when it operates at a high speed. After the mixture turned light and fluffy, the students added cake flour, baking powder, and milk into the mixture respectively. Last but not least, we poured the mixture into paper cups and decorated them with sprinkles, almonds, blueberries, and chocolate chips.

While we were waiting for the baking to be done, we chatted and washed the kitchen utensils. The students asked me a lot of questions about secondary school life, and I couldn't be happier to answer them. We had a really great time, and I felt over the moon when the students told me that this was one of the most interesting experiences they had ever had. That definitely made my day.

Overall, I think that the Creative Fun Day is a meaningful event that allows primary school students to learn more about secondary schools in a fun and interactive way. I learned to persist in things I want to achieve despite the little frustrations in life. It inspired me when one of the groups failed to make the right mixture but still insisted on trying again. Therefore, I am very grateful to be invited to this event once again to help the school and the students.

Creative Fun Day @ CCCKYC - Learning English through board games

On the 4th of November, I had the pleasure of being part of the Creative Fun Day as a helper for the English learning activity. My duty was to engage and interact with the young children in English while introducing them to the wonders of board games like Scrabble, Rummikub, and more.

As the primary students gathered around the tables filled with numerous board games, their eyes sparkled with curiosity. I began by explaining the rules of Scrabble. I could see the other English ambassadors doing the same with other games, as well as the NET teachers asking the primary school students about their hobbies and interests. At the beginning, some were hesitant to share their thoughts and communicate. However, as the games progressed, they expressed themselves with the English ambassadors and teachers without any hesitation. The room was filled with excitement as they passionately participated in the games. I felt enthusiastic as I learned more about the primary students. We created an environment where learning became a joyful and memorable experience.

After the games, the English ambassadors and I nominated 3 children who interacted using the English language the most for the special prize, which was chocolates. They were delighted after receiving it. The other primary students got the school's tote bags and sweets.

Creative Fun Day @ CCCKYC – STEAM Activities

With children's chatter and laughter, it was the Creative Fun Day where the students got to know our school better by participating in this event. I was overwhelmed when I got the chance to guide them through the lab.

With the introduction of STEAM, we took a deep dive into S (Science), T (Technology), and A (Arts), which brings us to the spotlight of the experiment: the 3D pen in the chemistry lab. As I did an example for the students, I reminded them of the hot parts of the pen that they needed to be cautious about. One of the students drew a pink heart and gave it to the teacher as a gift. It was very sweet of him. Another student challenged himself to draw a 3D box. At first, he failed as the plastic structure wasn't steady enough. I guided him to draw two frame outlines and then stick them together afterwards. What he got was a finished piece and a sense of accomplishment to take home.

In the I.S. lab, we started the Creative Fun Day by explaining to the kids about the microscope. Then we took some plant pieces and let the kids explore the microscope. It was delightful to see the primary school kids impressed by the precision of the microscope. Next, we conducted the Van de Graaff generator experiment. The students were told to take off their metallic accessories, and then the kids carefully placed their hands over the sphere of the structure. Seeing the kids try the experiment made me happy and grateful for our school's welcoming culture. Then, we did a Level 2 experiment in which we had to use a flame. One of the S6 students volunteered to demonstrate the experiment. In the experiment, we had to conduct electricity through our bodies and light the Bunsen burner. At first, we were quite frightened, but after conducting the experiment, we were very thrilled.

It was a bonus when I met students from my primary school. We had several chats about our school, and they seemed more open to me after the talks. When asked why they participated in this event out of curiosity, they answered that they wanted to gain insight into our school's facilities. I was glad that they chose this event. As I enjoyed the activities of this year, I'm looking forward to its appearance next year.

Sharing by Student Union Chairperson

Hello, I am Lai Yan Hei from 5A, the chairperson of the Student Union. I am honoured to work with my team of twelve members in this academic year. During the election, we encountered a lot of difficulties, from designing our platforms to promoting ourselves on social media. However, we did not give up at those hard times and threaded the needle together.

Not only am I blessed to have worked with the hard-working members, but also learnt a lot of practical skills. Leadership is the most essential quality of a chairperson. It includes effective communication strategies, organizational skills, motivational ability, and vision. There are moments that we hold different opinions; as a result, I need to remain calm and employ my problem-solving skills so that we can address each issue properly.

Martin Luther King Junior aptly said that "The ultimate measure of a man is not where he stands in moments of comfort and convenience, but where he stands at times of challenge and controversy." In this school year, we will continue to serve everyone enthusiastically and benevolently. We pledge to fulfill our responsibilities with determination, humility and gratitude.

「兩文三語」挑戰賽及全港青年翻譯比賽

很榮幸我得到參加不同比賽的機會，當中的經歷皆令我獲益良多。評審的肯定和獲得的獎項毋庸置疑地增加了我的信心，但同時見識過外面的舞台後，更深知自己還有很大的進步空間。

其中一個令我印象深刻的比賽為第五屆新界西「兩文三語」挑戰賽。這個比賽結集了來自不同學校擁有卓越實力的中學生。初賽後，我有幸獲得中文文章優異獎和英文文章銅獎，並得到進入複賽的機會。然而，複賽要求以粵普英三種語言朗誦，我不禁因要面對不擅長的朗誦範疇而慌張，

於是我不斷在賽前練習，希望能克服心裡障礙。雖然結果未如理想，但我很感恩自己踏出了嘗試的一步。相信若不是有這次機會，我還不能意識自己在說話時平鋪直叙，沒有起伏的問題。參加者抑揚起伏的音調和出色表現給予了我深刻的模範，讓我堅定地朝著目標努力。

另外一個比賽便是全港青年翻譯比賽，它為我帶來新奇且深刻的體驗。由於從未接觸過翻譯的工作，懷著好奇心和希望擴闊眼界的念頭而參加了這個比賽。當日大家忘著翻查字典，場地充斥著揭揭聲的場景至今仍歷歷在目。我十分高興能親身嘗試翻譯文章，增值自己的閱歷，更高興的是最後獲得不錯的成績。

這些經驗讓我堅信只要勇於嘗試，便能提升自己，有著豐富的得著。我期待著未來更多的挑戰，它們不僅是展示自己的機會，更是我成長的一點一滴。
